

AgilLink Subprocessors Listing

AgilLink is a data processor and engages Subprocessors that may process personal data submitted to the AgilLink service by the controller.

AgilLink shall not engage any Subprocessors for the performance of any part of the Services without notifying Customer. To the extent such a Subprocessor is so engaged and is or will be provided with Customer's Personal Data in connection with its performance of the Services, AgilLink will conduct appropriate due diligence on such Subprocessor to confirm that such Subprocessor can comply with the requirements of this Addendum. AgilLink will bind each such Subprocessor by written contract to obligations substantially similar to those owed by AgilLink to Customer under the Agreement.

These Subprocessors are listed with a description of the service. This list may be updated by AgilLink.
